There is a section on Jews: "Only a small number of Jews, who were in hiding, was 'umgesiedelt' [i.e. moved and eliminated]." Report No. 2 (May 1942), No. 3; No. 4 (containing reports from the Crimea and Ukraine) concerning Jewish life in the Crimea with historic background. Mentions that 44,000 Jews were concentrated in the five largest cities, and of the 6,000 Krimchaks, whom the Germans counted among the Jews, more than half lived in urban areas. "Their eradication [Ausmerzung], together with the real Jews and Gypsies in the Crimea was essentially carried out by early December 1941. The inclusion of Krimchaks and Gypsies in the fate of the Jews hardly caused a ripple among the population." Report No. 6 (June 1942) had a section on Jews in Estonia: "With the entry of the German troops the majority of Jews left Estonia. Only about 2,000 Jews remained, of whom half lived in Reval. The Sipo and SD gradually seized these Jews, avoiding any unnecessary disturbances of Estonian economic life. Today, there are no more Jews in Estonia." Report No. 7 has a section on Jews in Latvia. There were 93,479 Jews in the 1935 census. "After entry of the German troops there were about 70,000 Jews in Latvia; the remainder had fled with the Bolshevik Army. Acts of sabotage and arson soon after entry of the German troops were to a large extent instigated or carried out directly by Jews. Currently there are only a few Jews in the ghettos, who are being utilized as skilled craftsmen. Apart from these Jews (about 3,750) Latvia has in the meantime become free of Jews [Judenfrei]." Report No. 8; "The Jews in Lithuania" (1923 statistics 153,743 Jews; the NKVD eventually transported 40,000 to Siberia). "Even though Lithuanian hatred of Jews resulted in various pogroms, here too the Jewish problem had to be dealt with by the Sipo and the SD. Those Jews, who did not leave Lithuania with the retreating Bolshevik Army were put into ghettos....Currently there are ghettos in three cities only, which hold around 34,000 Jews. These Jews are currently being used as specialized workers primarily in defense-related industries....With the exception of those Jews, Lithuania is already free of Jews." Report No. 9:

"The Jews in Byelorussia" (500,000 Jews in 1931 census, particularly in Minsk, with 100-200,000 Jews). The measures taken by the Sipo and the SD have resulted there also in a basic change of the situation. To bring the Jews under effective control independent of

measures to be taken later, Jewish councils of elders were established which were responsible to Sipo and SD for the behavior of their fellow Jews. Additionally, registration of all Jews and their collection into ghettos were started. Lastly, the Jews were also identified by a yellow insignia to be worn front and back similar to the yellow Star of David introduced on Reich territory....These measures created in the Byelorussian region as well the basis for the solution of the European Jewish question contemplated for later on." Report no. 10 (July 1942): evacuation of Jews from the Reich. Between 17 November 1941 and 6 February 1942, 25 transports evacuated 25,103 Jews from every city in the Reich to Riga, and there they were put into camps and ghettos respectively. Summary report of Einsatzgruppe A from 16 October 1941 to January 1942 [also known as Stahlecker report]. This Einsatzgruppe was active in the Baltic region; the report is rather negative, influenced by the military pressure exerted by the Russians, complains about poor propaganda work, cites dire economic conditions in the Baltic, etc. In a section on Jews it says: "The systematic cleaning-up work in Ostland [occupied Baltic area] involved, in accordance with basic orders, the best feasible complete removal of Jewry. This aim has essentially been achieved, with the exception of Ruthenia, with the execution so far of 229,052 Jews." (Details for each Baltic state follow.) There is also a section on Jews being continuously sent east from Germany, of whom only a fraction is said to be useful for labor. "The mortality rate is steadily climbing, in part also because

of the extremely harsh winter." The overall report also discusses local church affairs, economic conditions, industry, and the resistance movements. List of Einsatzgruppe A's organization, leadership, with pie charts of staffing breakdown (the group consisted of 909 members as of February 1942). There are maps where the leaders are located, and more pie charts of the subordinated Einsatzkommandos. Also, a map of official German installations in the Reichskommissariat Ostland. Also attached are samples of anti-German leaflets and a Polish leaflet which notes that the German government has put the Poles on the same level as the Jews. 1941 - 1942.

- 93 Stahlecker Report I from (?) to 15 October 1941. Folder begins at image 2241

Einsatzgruppe A Summary Report up to 15 October 1941. States at the outset that the unit commenced its march on 23 June 1941, on the second day of the eastern campaign to repositioned camp sites. Mention is made of the use of local "volunteers": "...During the first hours after the invasion...local anti-Bolshevist forces were urged to carry out anti-Jewish pogroms."..."According to existing orders, the Sipo was determined to resolve the Jewish question with all means, and decisively." But it welcomed the opportunity not to appear on the scene of the anti-Jewish excesses, at least not right away," during the unusually harsh measures used [by the "volunteer"], which had an upsetting effect even among Germans." The "Struggle Against Jewry" section says in the first paragraph: "It was anticipated from the outset that pogroms alone will not resolve the Jewish question in Ostland. On the other hand, the Sipo clean-up work, according to basic orders, had as its aim the largest possible removal of the Jews. Consequently, Sonderkommandos to which were added selected forces - partisan groups in Lithuania, troops of auxiliary police in Latvia - carried out extensive executions in the cities and in the rural areas. The operations by the execution commandos went without a hitch. When assigning Lithuanian or Latvian forces to the execution commandos, the men primarily selected came whom families whose members and relatives were murdered or abducted by the Russians." Discussion of organizational measures taken by the group in the Baltic region. Report also includes a section on "Struggle Against Jewry," with detailed descriptions of action in the Baltic countries. Here is another mention that the "basic orders" required the most all-encompassing "removal of the Jews."
